

LESSON 8 - ASSIGNMENT

1. Submit a scientific description of the anatomical characteristics of a dog, based upon the dog you observed in your set task.
2. How can you quickly and easily distinguish between a carnivore and a rodent?
3. Compare the characteristics of three different families in the Order Carnivora.
4. Distinguish between home range and territory.
5. Explain how mating habits may be related to the size of a social group of mammals.
6. Describe common characteristics of social behaviour in carnivores based upon what you have read in this lesson.
